The Mission of Asahi University

The mission of Asahi University is foster individuals who are rich in sociality and creativity, which are two important elements to open up the international society in the future, and rich in universal human intelligence common to all people.

About Sociality

The idea of co-existence of human beings faces many problems to be solved, such as a problem of global resource and environment, a labor problem in the aging society, a problem of international economy in advanced countries, and problem of social economy in developing countries. To deal with such problems and to promote prosperity and happiness of human being, Asahi University aims to foster such individuals who have international sense and sociality, and respect harmony.

About Creativity

Thanks to the dramatic development of science and technology, the human being has obtained material wealth, but this development of science and technology must contribute to the formation of well-round character as well. To harmonize the progress of advanced science and the formation of well-round character, the human being needs to use the creative wisdom.

To attain this goal, Asahi University promotes specialized and comprehensive education and researches with the interdisciplinary cooperation of natural science, human and social science, and other arts.

About Human Intelligence

As we face the age of highly advanced industrial and information society, our style of living and values has been drastically changing. While we enjoy the sound development of science and technology, we must also control the runaway of such development. In this respect, Asahi University strives to foster new human intelligence to boost humanity as universal ideal to all mankind, to establish individuality, and to construct a harmonious international future society in which human rights and freedom are respected.

Asahi University's Mission and Goal

Asahi University respects the meanings of the Basic Act of Education and the School Education Act, and aims at the following targets in accordance with the provisions of the Laws.

- 1) Doing educational research on the theory and application of general education, special arts, and sciences, and fostering human resources with intellectual and moral culture.
- 2) In quest of knowledge widely all over the world, aiming at international exchanges of education and scientific research and attaining the purpose of advanced education, thus making improvement in arts, sciences, and culture and contributing to the development of society.
